Acculogic Offers Production Board Test Systems for the Automotive Industry

The image displays four Acculogic test systems: INLINE TEST, FUNCTIONAL TEST SYSTEMS, FLYING PROBE TESTERS, and PRODUCTION TEST SYSTEMS. Each system is accompanied by a list of features:

- INLINE TEST**
 - Seamless Integration
 - Easy Fixture Exchange
 - Double Sided Probing
- FUNCTIONAL TEST SYSTEMS**
 - SlabVIEW, CVI & TestStand
 - C, C++, C#, VB Support JTAG & ISP
 - Easy Fixture Exchange
 - Double Sided Probing
- FLYING PROBE TESTERS**
 - Fast program development
 - Fixtureless Testing
 - Exceptional fault coverage
- PRODUCTION TEST SYSTEMS**
 - Low Cost
 - Scalable & Reusable
 - Test & ISP

Markham, ON —September 2019 — Acculogic Inc., a global leader in electronic production test solutions, announces plans to exhibit in Booth #13006 at the Automotive Testing Expo, scheduled to take place Oct. 22 - 24 2019, at the Suburban Collection Showplace in Novi, MI. The company will feature In-line, Production, and Functional Test Systems in addition to its Flying Probe Test Platform.

Manufacturers in the automotive industry can meet their quality and time to market objectives with Acculogic's production board test systems. The company's functional & in-circuit test platforms can be automated and integrated into existing production lines or operated manually as stand-alone systems. Acculogic test systems can be used for a wide range of automotive ECU test requirements, including:

- Infotainment, radio & GPS
- Collision avoidance and radar

- EV batteries
- Driving assistance systems
- Dashboard electronics

Furthermore, Acculogic has developed a novel way to test the wire bonds in battery arrays using its automated test platform. With a marked increase in demand for batteries on the horizon, such as for electric vehicles (EVs), mobile energy storage, solar power, and energy-efficient homes, the company is paving the way for large-scale, high-speed battery array testing.
